Technical Skills

Languages: TypeScript, JavaScript, Swift, Python, SQL, Solidity, C++, C#

Developer Tools: Git, Docker, Firebase, AWS, Supabase, Figma, Xcode, VS Code

Libraries/Frameworks: React, Next.js, Node.js, Express.js, SwiftUI, Angular, PostgreSQL, MongoDB

Work Experience

OSTREMO

Jan 2022 – Present

Full-Stack Software Engineer

Frederick, MD

- Developed the OSTREMO website end-to-end, translating brand identity into a responsive, high-performance web platform.
- Designed backend infrastructure and managed local and cloud server environments while integrating relational databases to support scalable application services.

Dynamic Pricing QR SaaS

Jan 2026 – Present

Co-Founder & Founding Software Engineer

- Built a B2B SaaS platform that enables sellers to dynamically price and manage physical inventory using QR-based product identification.
- Engineered a **React/TypeScript** frontend and **PostgreSQL/Supabase** backend to support real-time pricing workflows and product data management.
- Designed scalable REST APIs to process live QR scans and deliver structured metadata through JSON data pipelines.

Debloat Buddy – G Digital LLC

Jan 2025 – Present

Full-Stack Software Engineer

- Launched an AI-powered consumer health application supporting a community of **200,000+ users** across social platforms.
- Developed reusable UI components and scalable data flows to improve application performance and user engagement.
- Implemented backend using **TypeScript, Firebase (Auth, Firestore, Cloud Functions), and OpenAI.**

Ethereum Ecosystem

06/2023 – 12/2024

Full-Stack Developer (Smart Contracts & Web)

- Designed and deployed **Solidity smart contracts** with anti-bot protections, liquidity controls, and tokenomics logic.
- Contributed to **\$500K+ revenue** and scaled the ecosystem to an **\$8M+ market cap.**
- Developed full-stack web platforms integrating on-chain contract interactions, real-time wallet balances, and liquidity data.

MeeFirst

11/2022 – 12/2025

Full-Stack Software Engineer (Part-Time)

- Developed and maintained a multi-purpose Discord bot serving **4,000+ active users** with **99.9% uptime.**
- Implemented modular services including music streaming, moderation tools, leveling systems, and dynamic voice channel management.

ChainGate

08/2025

Full-Stack Software Engineer (Contract)

- Engineered a real-time token-gated access control system that synchronizes permissions based on live blockchain balances.
- Built automated monitoring services to verify wallet ownership and update access permissions across private platforms.

Projects

Echo Vision – Real-Time Transcription Overlay

Dec 2025 – Present

- Developing a low-latency speech recognition overlay with streaming audio pipelines and incremental transcript rendering.
- Designing local-first inference strategies and customizable UI layers to improve accessibility for Deaf and hard-of-hearing users.

Education

Western Governors University

Expected 06/2027

B.S. Computer Science

Millcreek, UT

JSM Mastery Bootcamp

01/2022 – 06/2022

B.S. Computer Science

Millcreek, UT

Harvard - CS50's Web Programming

04/2026
